SECTION 265

SELECT GRANULAR MATERIAL

265-1 DESCRIPTION

Furnish and place select granular material in accordance with the contract and as directed.

265-2 MATERIALS

Refer to Division 10.

Item	Section
Select Material, Class II	1016
Select Material, Class III	1016

265-3 CONSTRUCTION METHODS

Use only Class III select material for embankments in water.

Place select granular material up to 3 ft above geotextile for soil stabilization and the water level.

265-4 MEASUREMENT AND PAYMENT

Select granular material will be paid as *Select Granular Material* unless the material is obtained from the same source as the borrow material and the contract includes a pay item for *Borrow Excavation*. When this occurs, *Select Granular Material* will be paid at the lower bid price per cubic yard for either *Borrow Excavation* or *Select Granular Material*.

Select Granular Material will be measured and paid in cubic yards. When undercut excavation is in accordance with Section 226 and the Engineer requires undercut to be backfilled with select granular material, the second sentence of the sixth paragraph of Article 226-3 will not apply, as payment for the backfill will be made as described in this article.

Select Granular Material will be measured by in place measurement in accordance with Article 230-5 or by weighing material in trucks in accordance with Article 106-7 as determined by the Engineer. When select granular material is weighed in trucks, a unit weight of 135 lb/cf will be used to convert the weight of select granular material to cubic yards. At the Engineer's discretion, truck measurement in accordance with Article 230-5 may be used instead of weighing material in trucks.

The contract unit prices for *Select Granular Material* and *Borrow Excavation* as described above will be full compensation for providing, transporting, handling, placing, compacting and maintaining select granular material.

Payment will be made under:
